[Overview](#) | [About the IAT](#) | [Ethical Considerations](#) | [Frequently Asked Questions](#)

People don't always say what's on their minds. One reason is that they are unwilling. For example, someone might report smoking a pack of cigarettes per day because they are embarrassed to admit that they smoke two. Another reason is that they are unable. A smoker might truly believe that she smokes a pack a day, or might not keep track at all. The difference between being unwilling and unable is the difference between purposely hiding something from someone and unknowingly hiding something from yourself.

The Implicit Association Test (IAT) measures attitudes and beliefs that people may be unwilling or unable to report. The IAT may be especially interesting if it shows that you have an implicit attitude that you did not know about. For example, you may believe that women and men should be equally associated with science, but your automatic associations could show that you (like many others) associate men with science more than you associate women with science.

We hope you have been able to take something of value from the experience of taking one or more of these tests. The links above will provide more information about the IAT and implicit attitudes; we will periodically update the information to reflect our current understanding of the unconscious roots of thought and feeling.

**Data Privacy:** Data exchanged with this site are protected by SSL encryption. Project Implicit uses the same secure hypertext transfer protocol (HTTPS) that banks use to securely transfer credit card information. This provides strong security for data transfer to and from our website. IP addresses are routinely recorded, but are completely confidential. We make the anonymous data collected on the Project Implicit Demonstration website publicly available. You can find more information on our [Data Privacy page](#).

**Important disclaimer:** In reporting to you results of any IAT test that you take, we will mention possible interpretations that have a basis in research done (at the University of Washington, University of Virginia, Harvard University, and Yale University) with these tests. However, these Universities, as well as the individual researchers who have contributed to this site, make no claim for the validity of these suggested interpretations. If you are unprepared to encounter interpretations that you might find objectionable, please do not proceed further. You may prefer to examine [general information about the IAT](#) before deciding whether or not to proceed.

I am aware of the possibility of encountering interpretations of my IAT test performance with which I may not agree. Knowing this, I wish to proceed

- Skin-tone IAT** *Skin-tone* ('Light Skin - Dark Skin' IAT). This IAT requires the ability to recognize light and dark-skinned faces. It often reveals an automatic preference for light-skin relative to dark-skin.
- Asian IAT** *Asian American* ('Asian - European American' IAT). This IAT requires the ability to recognize White and Asian-American faces, and images of places that are either American or Foreign in origin.
- Transgender IAT** *Transgender* ('Transgender People - Cisgender People' IAT). This IAT requires the ability to distinguish photos of transgender celebrity faces from photos of cisgender celebrity faces.
- Arab-Muslim IAT** *Arab-Muslim* ('Arab Muslim - Other People' IAT). This IAT requires the ability to distinguish names that are likely to belong to Arab-Muslims versus people of other nationalities or religions.
- Religion IAT** *Religion* ('Religions' IAT). This IAT requires some familiarity with religious terms from various world religions.
- Race IAT** *Race* ('Black - White' IAT). This IAT requires the ability to distinguish faces of European and African origin. It indicates that most Americans have an automatic preference for white over black.
- Sexuality IAT** *Sexuality* ('Gay - Straight' IAT). This IAT requires the ability to distinguish words and symbols representing gay and straight people. It often reveals an automatic preference for straight relative to gay people.
- Weight IAT** *Weight* ('Fat - Thin' IAT). This IAT requires the ability to distinguish faces of people who are obese and people who are thin. It often reveals an automatic preference for thin people relative to fat people.
- Disability IAT** *Disability* ('Disabled - Able' IAT). This IAT requires the ability to recognize symbols representing abled and disabled individuals.
- Presidents IAT** *Presidents* ('Presidential Popularity' IAT). This IAT requires the ability to recognize photos of Joseph Biden and one or more previous presidents.
- Gender-Science IAT** *Gender - Science*. This IAT often reveals a relative link between liberal arts and females and between science and males.
- Age IAT** *Age* ('Young - Old' IAT). This IAT requires the ability to distinguish old from young faces. This test often indicates that Americans have automatic preference for young over old.
- Weapons IAT** *Weapons* ('Weapons - Harmless Objects' IAT). This IAT requires the ability to recognize White and Black faces, and images of weapons or harmless objects.
- Gender-Career IAT** *Gender - Career*. This IAT often reveals a relative link between family and females and between career and males.

## Vorab-Informationen

Auf der nächsten Seite werden Sie aufgefordert, einen impliziten Assoziationstest (IAT) aus einer Liste möglicher Themen auszuwählen. Wir werden Sie zusätzlich (optional) nach Ihren jeweiligen Einstellungen oder Überzeugungen sowie einigen Angaben zu Ihrer Person fragen.

Wir stellen diese Fragen, weil der IAT nützlicher sein kann, wenn Sie auch Ihr eigenes Selbstverständnis der Einstellung oder des Stereotyps beschreiben, die der IAT misst. Darüber hinaus möchten wir auch die Unterschiede zwischen Personen und Gruppen vergleichen.

### Datenschutz:

Die mit dieser Seite ausgetauschten Daten sind durch SSL-Verschlüsselung geschützt. Project Implicit verwendet dasselbe sichere Hypertext-Übertragungsprotokoll (HTTPS), das Banken zur sicheren Übertragung von Kreditkarteninformationen verwenden. Dies ermöglicht hohe Sicherheit für den Datentransfer zu und von unserer Seite. IP-Adressen werden routinemäßig aufgezeichnet, sind aber absolut vertraulich. Wir machen die anonym auf der Demonstrations-Website von Project Implicit gesammelten Daten öffentlich zugänglich. Weitere Informationen finden Sie auf unserer [Seite zum Datenschutz](#).

### Wichtiger Hinweis:

Wenn wir Ihnen die Ergebnisse eines von Ihnen durchgeführten IAT-Tests mitteilen, werden wir mögliche Interpretationen erwähnen, die auf Forschungsergebnissen beruhen, die (an der University of Washington, der University of Virginia, der Harvard University und der Yale University) mit diesen Tests durchgeführt wurden. Diese Universitäten sowie die einzelnen Forschenden, die zu dieser Website beigetragen haben, erheben jedoch keinen Anspruch auf die Gültigkeit dieser vorgeschlagenen Interpretationen. Wenn Sie nicht darauf vorbereitet sind, auf Interpretationen zu stoßen, die Sie unangenehm finden könnten, fahren Sie bitte nicht weiter fort.

**Ich bin mir darüber im Klaren, dass ich möglicherweise Auswertungen über meine IAT Ergebnisse bekomme, denen ich nicht zustimmen würde. [Ich habe dies zur Kenntnis genommen und möchte fortfahren.](#)**
